

Mubea Carbo Tech is a highly innovative and continuously expanding company located in Salzburg. With approximately 530 people working onsite in Salzburg, we produce composite components – custom-made for motor racing, and serially produced for the car industry. Our product range includes structural components such as the monocoque, aerodynamic parts, components for the outer shell, as well as custom-made components. Our clients are renowned car producers and industrial corporate groups.

To strengthen our team, we are looking for a
Project Manager
Composite Components
In a worldwide-active industrial company/ location Salzburg
with the earliest possible starting date.

Your tasks:

- Project management directly with the customer, including specifying and documenting product requirements in close coordination with the customer and the internal divisions involved in the development process - construction, R&D, manufacturing, purchasing and quality control
- Cooperating on the preparation of a concept, constructive development and production of the entire product and process documentation
- Implementing continuous design verifications, or design reviews, to secure specific features of the products
- To round off the interesting area of responsibility, achieving and managing deadlines, quality and cost objectives, planning and supervising the entire process of product testing and product validations.

We expect from you:

- technical or business education
- work experience in project management is an advantage (preferably in the automotive sector)
- self-assured handling of FMEA and master sample test reports (APQP, PPAP etc.)
- high dedication, ability to work in a team, as well as confident appearance when dealing with customers
- knowledge of the standards common in the automotive area (ISO/TS 16949)
- readiness to travel
- we automatically expect very good English and German, IT/EDP skills

We offer a challenging and versatile job with a high level of freedom in a global field and in a company with short decision-making paths and corresponding career development perspectives. If you are flexible, a team player and able to work under pressure, please send us your compelling application documents, preferably per e-mail to:
