

JOB OFFER

Contract for work or service for research projects

Profile: Developer

Professional category: Graduate, Engineer, Technical Engineer

Job description:

The hired profile will have to work on projects that require development for proper maintenance as well as the development of new functionalities. We are looking for a profile that has high programming capabilities, mainly Python, but we will also value the use of other languages (Java and/or Matlab) or his/her ability to program in other tools if necessary.

Signal processing fundamentals are required and knowledge in databases (design, access, queries, programmatic access, installation and maintenance) will be valued positively.

Although it is not necessary, it is also valuable knowledge of methodologies and processes related to research. We are looking for a developer who may be interested in being part of the team not only as a programmer, but also as a potential doctoral candidate. We want someone who is enthusiastic, eager to work and fearless of new challenges. With leadership and teamwork skills.

Work center: Biomedical Technology Center. Highway M40, Km. 38,28223, Pozuelo de Alarcón (Montegancedo Campus)

Working hours: 37.5 h/week

Annual gross wage: To be defined.

Estimated duration: 1 year renewable

Expected start date: Immediate

Required degree: Computer Engineering, Telecommunications or related engineering

Necessary experience:

- Signal Processing
- Data analysis (not required but will be valued)
- Databases
- Programming

Interested send CV to:

consuelo.gonzalo@upm.es

Letters of recommendation or reference will be assessed together with the sending of the CV.

Deadline for receiving CVs: February 15,2018
