

Scholarship for students

We are Atos Research & Innovation (ARI), the R&D&i hub for new technologies and a key reference for the whole Atos group. Thanks to our large expertise in research, development and innovation projects, we can bring new solutions and innovative elements to customers' business.

The main objectives of the Research & Innovation group are:

- Participate in research, development and innovation (RDI) projects that enrich Atos offer portfolio, market view or position with respect to emerging technologies
- Be a source of innovative ideas to be used by Atos sales force and technical staff
- Become an entry gate to European institutions for the different units and customers of Atos, thanks to the large background of European Commission projects (since 1987)
- Support Atos business units in other countries, as well as their customers, thanks to the network of public and private partners across Europe, which in turn, are current or potential customers of the company

ARI has 11 sectors, which are research teams specialized in the needs of customers from particular business fields (e.g. Transportation, Telecom, Health, etc) and 6 labs, which are research teams specialized in a certain domain of technologies (Cybersecurity, Bioinformatics, Identity & Privacy, Data Intelligence, NG Cloud and Internet Of Everything).

We look for a candidate for ARI Health sector, expected to work in European R&D projects and in technology transfer of its outcomes. With the goal of promoting healthy living and improving healthcare, you will be given a technical context in which with our aid we expect you can develop and carry out your initiatives. We will meet you, we will ask you for your background and your professional interest, and together we will try to propose different initiatives where you can develop your own ideas. Our objective is to provide you with an initial job experience that can establish a start point for continuing with your final degree/MSc project.

Essential skills:

- Creativity, able to provide innovative solutions to existing problems.
- Proactivity, being able to initiate change.
- Communication and teamwork.
- Commitment, you will be developing your own work with our assistance.
- Advanced English level is highly recommended.

Valuable skills:

- Web development (Java, Maven, Javascript, HTML5, etc)
- Mobile development
- Agile methodologies, continuous integration
- DevOps

If you have an interest in exploring the possibility, I kindly ask you to send your CV to the following address: santiago.aso@atos.net. Including in the subject line the reference "ARI-HEALTH Scholarship".
