Future Shock? Cybersecurity in the 21st Century

Our digital future has threats as well as opportunities, from the hacking of everyday software programmes used by billions of people to attacks on democratic processes, business activities and personal data. Cyberwarfare, cyberespionage, and cybersecurity are all concepts that affect everyone from sovereign states to individual citizens – often when we are unaware of it taking place.

Professor Carsten Sørensen, Department of Management, London School of Economics and Political Science

Professor Peter Sommer, Founder of the Information Risk and Security Programme, LSE/Birmingham University

Professor Ross Anderson, Co-Director, Cambridge University Computer Lab

Tuesday, 5th February 2019

19:00-20:30

Salón de Actos - Fundación Ramón Areces, (Calle Vitruvio, 5 – Madrid)

Inscripciones: [Conferencia: ¿Impacto Futuro? Ciberseguridad en el Siglo XXI](#)
