Full Job Description

Our company is an emerging, well-funded start-up based in Madrid, Spain revolutionizing the cybersecurity industry with a proprietary software solution that ends with document leakage. We are seeking a Full Stack Developer.

Reporting to the company's Chief Technology Officer, the Full Stack developer will be responsible for designing, coding, creating, and modifying web apps, from layout to function and according to the specifications and integrating data from back-end services and databases.

Key Responsibilities

- Candidate must have a strong understanding of UI, cross-browser compatibility, general web functions, and standards.
- Deep expertise and hands-on experience with Web Applications and programming languages such as HTML, CSS, JavaScript, JQuery and API's.
- Hands-on experience with experience designing user interactions on websites, developing servers, and databases for website functionality.
- Developing front end website architecture.
- The position requires constant communication with colleagues.

Desired Skills

- Bachelor's degree in Computer Science or Engineering
- Proficiency with fundamental front-end languages such as HTML, CSS, and JavaScript.
- Proficiency with server-side languages such as Python, Ruby, Java, PHP, and .Net.
- Familiarity with database technology such as MySQL, Oracle, and MongoDB.
- Familiarity with C and C++ programming languages.
- Familiarity with cloud-based infrastructure like AWS, GCP, etc.
- Familiarity with JavaScript frameworks such as Angular JS, React, and Amber.
- Good problem-solving skills. Attention to detail.
- Strong organizational and project management skills.
- Verbal communication skills.
- Great attitude and ability to work in a fast-paced, collaborative environment is a must
