IT Specialist / Programmer for Catia V5 Automation

Job Description / Duties and Responsibilities

The focus of your work will be to implement Macros to Catia V5, to match client requirements in terms of customization and automation:

- some operations can be automated and saved in Macros, thus saving time;
- some complex operations are not possible or not quick enough in raw Catia V5, but can be implemented in Macros

Client and Site Description

Volkswagen, site *Wolfsburg*

Requisites of the candidate

- Professional experience in Automation and/or Programming
- Knowledge of Design Methodologies, Manufacturing Process, and Catia V5 is strongly advantageous
- German at conversation level is strongly advantageous, but not required
- If German is not fluent at business level, English fluency at business level is required
- Ability to work both alone and within a team

NEAR GmbH: Who we are

- NEAR GmbH is a high level technological consultancy firm focused in major vehicle industry.
- For over 20 years putting technological consultancy into practice has meant for us: Consulting, Engineering, Project Management, Training, IT Management and Prototyping all in one.
- The core of our work is to find talented and ambitious colleagues and help them to perform at a high demanding job within the installations of one of our challenging clients. Thanks to our dedication and delivered quality the relationships tend to be stable and last several years, more than a mere project for a few months!
