Go-Gourmet – start-up

<u>Web-software and app developers</u>

We are a group of international MBAs from IE Business School and we are working on a project about food, nutrition and social responsibility. The project is also in the International Lab, incubator for innovative ideas by MadridEmprende.

<u>What we offer?</u>
GoGourmet team is looking at involving in the entrepreneurial project few just-graduated or still undergraduates but in the last year (also as final project for the graduation exam), to collaborate in developing the multidimensional platform: web-based software, database structure and mobile app.

Candidates will work in the International Lab (Calle Bailén, 41, Madrid), a young environment surrounding by many innovative start-ups, with big autonomy and self-organization in working, and with the opportunity to live an exciting and learning entrepreneurial venture experience.

We offer internship contracts for 3 months, from March 2014 to June 2014, with possibility to renew it for other 3 months. Each candidate will be evaluated individually, based on his/her IT skills, working attitude and fit with the team. After that evaluation, the offer will be made; it may include ownership in the start-up company and future collaboration also for international expansion.

<u>What we look for?</u>
- Already graduated or in the last year of university;
- Strong knowledge in <u>at least one</u> of the followings:
    - database programming (SQL or similar) and database configuration;
    - web-based software programming;
    - apps programming (Android and IPhone);
    - web and apps design;
- Intermediate level of English;
- Preferably, an interest about food and nutrition
