Our people are driven by a passion for 'Where next?' If you want to shape your career and the future of travel, Amadeus is the place for you.

Job description :

Summary of the role

The New Business Unit division provides Software dedicated for main actors of the travel industry (Hotel companies, Rail companies, Travel Agencies).

Within this division, RFO team handles the specific features related to the fast evolving train market. The team is compounded of 9 software engineers who are mainly working on a web application targeting professional travel agents. They are responsible of the design, development and maintenance of SNCF, Deutsche Bahn, TrenItalia and Swedish Rail functionalities.

Main responsibilities

We have the strategy to enlarge our rail trip booking tool offer to direct sales channels. This means that we have to provide with two applications:

- One for professional working in railways call centers and stations
- One for travelers in rail station available through kiosk machine

The purpose of this internship is to develop the interconnection of this application with peripherals like pin pad for credit card payment, scanner for rail tickets, dedicated ticket printers, special keyboard...

In order to achieve this goal, the trainee will participate to the following activities:

- Participating to technical design
- Participating to discussion with the Marketing to define requirements
- Participating to test and development
- Writing documentation

During the internship, the trainee will collaborate with experienced software engineers from different teams.

She/He will then have the opportunity to apply and extend her/his knowledge.

She/He will be integrated to RFO team and will discover the different cycles of Product development and team

work.
