

## **Software Development Intern**

Our company “shaadow” is a software company that is revolutionizing the cybersecurity industry with a SaaS product based on a proprietary software solution that ends with document leakage. We are based in Madrid, although we have a global scope.

We are looking for a talented intern to join our software development team with the chance to renew the contract or move on to join.

We are interested in highly responsible people with a high level of motivation that will support the software development team.

We offer to join a 100% remote team, working alongside large technology companies in the field of telecommunications and IT and a flexible way of working with a culture built on trust, respect, teamwork, communication, and creativity.

### **Preferred Qualifications**

Experience with AWS serverless. API GW is a plus.

Experience with Python.

Good problem-solving skills. Attention to detail.

Great attitude and ability to work in a fast-paced, collaborative environment is a must

Good written and spoken English and Spanish.

### **We offer**

Joining a fast-growing company with great career opportunities for growth.

Remote position.

Flexible working hours.

Working shoulder to shoulder with first multinational tech companies.

After the internship, the opportunity to continue as a company employee.
